DETAILED ACTION

The following is an examiner's statement of reasons for allowance: The prior art made of record did not disclose or render obvious a method for protection against stroke comprising the step of expanding the second expandable member to at least partially obstruct the external carotid artery thereby abolishing antegrade blood flow in the internal carotid artery and causing the blood flow to reverse in this artery without blocking the internal carotid artery downstream of the lesion in combination with the other recited steps. Zadno-Azizi (WO 98/38930) does not anticipate this step because Zadno-Azizi teaches to block the internal carotid artery downstream of the lesion (Figure 18) to help create a working area so that emboli can be aspirated from the enclosed working area. It would not be obvious to modify the method of Zadno-Azizi with the step recited by the applicant because if the internal carotid artery was left unblocked in the method of Zadno-Azizi, emboli could move distally to the brain and result in a stroke.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
